ACM Transactions on Embedded Systems
Editor-in-Chief
Prof. Dr. Jörg Henkel

Dear Prof. Henkel,

I would like to submit the attached manuscript, "A Comprehensive Approach for Power Management in Embedded Systems", for consideration for possible publication in the ACM Transactions on Embedded Systems.

In respect to a nomination for editor, I am not sure about TECS policy, but Prof. Dr. Nikil Dutt's work on low-power compilation techniques has a good interface to the manuscript.

Regarding the option of nominating reviewers, my two nominees are:

Frank Belossa
Universtität Karlsruhe

Pai Chou
University of California, Irvine

Both Prof. Belossa and Prof. Chou have a long publication list on power management and energy-aware embedded systems and have advised students in areas close to that of the manuscript. The nominees for editor and reviewers have no conflict of interest with the author of the paper being submitted.

This paper has not been published or accepted for publication and it is not under consideration at another journal.

Sincerely,

A handwritten signature in black ink, reading "Fröhlich", written over a horizontal line.

Antônio Augusto Fröhlich
